

Alex Rodriguez

Professional Summary

Passionate and highly resourceful professional with proficiencies in all stages of Java programming, front-end development, and technical troubleshooting. Experienced in logistics, ERP (Enterprise Resource Planning), and inventory management applications. Seeking further employment in a back-end, web development, or infrastructure role.

SKILLS

Core Java, Spring Boot, Rest APIs, Jira, HTML5

Lua, SQL, Kubernetes, Git, CSS

Azure, Microservices, CI/CD, Linux, Javascript

EXPERIENCE

Walmart, Bentonville, AR (remote) – Java Developer

April 2021 – January 2023

Member of Walmart Global Tech's NOVA Team, an international supply chain management system.

Part of the International App Modernization Team, where I helped bring Legacy code into the modern age, mainly by migrating COBOL->Java and Java 8->Java 11.

Configured multiple databases to better fit end-user needs

Participated in weekly meetings with international teams in order to facilitate communication between markets and development environments

Performed scheduled maintenance on components using Walmart's Native Cloud Platform, a hybrid kubernetes-based platform using both Azure and Google cloud deployments

MMOMinion, (remote) – Lua Scripter/Marketplace Contributor

October 2020 – April 2021

Created, refined, monetized and sold various Lua scripts for the popular video game Guild Wars 2 using a framework developed by MMOMinion.

Wrote technical documentation for scripts as well as responded to end-user feedback regarding bugs, issues and necessary updates

Assisted end-users in a customer support role, providing technical troubleshooting and advice when needed

Had bi-weekly meetings with the framework team to discuss potential issues, earnings, and future strategies

United States Navy, Various – *Sonar Technician/FMF Corpsman*

Feb 2017 – September 2020

Operated sonar, radar, and other navigation equipment underwater.

Received a Submarine Warfare Pin ("Dolphins") certifying that I have an advanced knowledge of all aspects of the modern nuclear submarine.

Crossrated into a Fleet Marine Force Corpsman. I was subsequently attached to a small squad of Marines and deployed to Yemen for 17 months. Upon being injured in combat overseas, I returned home and left the service. For my time and what I experienced, I was awarded a Purple Heart as well as a Silver Star.
